HEALTH APPRAISAL QUESTIONNAIRE

Name _____ Date _____

DIRECTIONS

This questionnaire asks you to assess how you have been feeling **during the last four months**. This information will help you keep track of how your physical, mental and emotional states respond to changes you make in your eating habits, priorities, supplement program, social and family life, level of physical activity and time spent on personal growth. All information is held in strict confidence. Take all the time you need to complete this questionnaire.

For each question, circle the number that best describes your symptoms:

0 = No or Rarely—You have never experienced the symptom or the symptom is familiar to you but you perceive it as insignificant (monthly or less)

1 = Occasionally—Symptom comes and goes and is linked in your mind to stress, diet, fatigue or some identifiable trigger

4 = Often—Symptom occurs 2-3 times per week and/or with a frequency that bothers you enough that you would like to do something about it

8 = Frequently—Symptom occurs 4 or more times per week and/or you are aware of the symptom every day, or it occurs with regularity on a monthly or cyclical basis

Some questions require a YES or NO response: 0 = NO 8 = YES

Identi-T™ Stress Assessment

Name _____ Age _____ Sex _____ Date _____

Stress is a normal part of life. Every day, we're faced with stimuli, called stressors, which can elicit the body's "fight or flight" response, setting off a cascade of physiological reactions and resulting in emotions ranging from mild to intense. But while occasional stress is natural and even healthy, chronic or acute stress can be harmful.

Please take a few moments to discover your body's response to situations you perceive as stressful. By honestly assessing how you feel, your healthcare provider can create a natural stress relief program for your individual needs.

Directions:

Please read each statement and circle the number 0, 1, 2, or 3 that best describes your feelings or reactions throughout the course of the day. Determine the subtotal score for each section, then determine the total scores for sections A-C and C-E. Some questions may appear redundant between sections. There's a reason for each question. Don't spend much time on any one question.

GRAND TOTAL SCORE (add totals from Sections A, B, C)	

The Grand Total Score will help you and your physician decide if your health problems are yeast-connected. Scores for women will run higher, as 7 items in this questionnaire apply exclusively to women, while only 2 apply exclusively to men.

- Yeast-connected health problems are almost certainly present in women with scores over **180**, and in men with scores over **140**.
- Yeast-connected health problems are probably present in women with scores over **120**, and in men with scores over **90**.
- Yeast-connected health problems are possibly present in women with scores over **60**, and in men with scores over **40**.
- With scores less than **60** for women and **40** for men, yeast are less apt to cause health problems.
